

EVER PS POPUP

DOCUMENTATION

Popup Module

PREREQUISITE

Server

The Ever PS Popup module runs on a PHP version from 5.6 to 7.

Prestashop

The module works on Prestashop 1.6 & 1.7 versions

INSTALLATION & CONFIGURATION

Adding the module to your shop

Prestashop 1.6

From your Prestashop administration interface, click on the "Modules and Services" tab.

Place the module on your site by clicking on the "Add a module" button and install it.

Prestashop 1.7

From your Prestashop administration interface, click on the "Modules" tab, then "Modules and services".

By adding the module on your site, it will install itself.

Configuration

Default module configuration

For the module to work without any error, you will have to confirm if you use Fancybox for popups.

If Fancybox already exists on your theme, please disable it on module configuration.

Default setting is set to yes.

The screenshot shows a configuration window titled "RÉGLAGES" with a gear icon. It contains a toggle switch for "Activer Fancybox" with "OUI" (Yes) selected and "NON" (No) as an alternative. Below the toggle is the text "Utiliser Fancybox pour les popups". In the bottom right corner, there is a button with a floppy disk icon labeled "Enregistrer" (Save).

Creating popups

You can create popups by going to the menu tab provided for this purpose

- Prestashop 1.6: under the "Preferences" tab
- Prestashop 1.7: under the "Appearance" tab

The link is called "Ever Popup".

Click on the + button to add a popup

The screenshot shows the "Add a new popup" form. At the top is a light blue header with a question mark icon and the text "Add a new popup". Below this is a section titled "Catégorie" (Category) with a list of categories, including "Accueil" (Home). To the right of the category list are buttons for "Collapse All", "Expand All", "Check All", "Uncheck All", and a search bar labeled "chercher...". Below the category list is a note: "Set popup only in specific categories". There are two required fields marked with a red asterisk: "Where to show the popup ?" with a dropdown menu set to "CMS only", and "Lifetime of the cookie (in days)" with a dropdown menu set to "Désactivé" (Deactivated). Below the second dropdown is a note: "Choose default controller for this popup".

Decide on which category you want to display the popup, the field is not required

Specify where to display the popup. If you have selected categories, be sure to set to "All" or "Only categories"

Specify the time to reappear the popup for the user (lifetime of the cookie). To debug or work on your popup, set the setting to "Off"

For unlogged users ☐ OUI ☒ NON
Popup only for unlogged users

Show newsletter subscription form ? ☐ OUI ☒ NON
You must have Prestashop newsletter module

*** Nom**
Won't appear on front-office

Popup content

<> A B I U Paragraphe ▼

Type popup content

If you want to display the popup only for non-connected users, set "For non-connected users" to "Yes". If necessary, the popup will be displayed for all Internet users

If you wish to propose a newsletter registration form, put the corresponding box on "Yes". The newsletter module of Prestashop must imperatively be installed on your site.

Specify the name of your popup, in order to find it more easily in the administration of your site

Enter the content of your popup for each language, using shortcodes

Popup link
Will make all popup cliquable

Popup content background color
Will change popup content color

Popup image background

Ajouter un fichier

For all popup size, including content

Adult mode ☐ OUI ☒ NON
Set yes for asking user birthday

Specify the link of the popup if you want to make it clickable. The link is to be filled in for each language

If you want your text to have a background color, choose the corresponding color

You can also put a background image for your popup. This will be at the bottom of the entire popup, the background color only applies to the text box.

The adult mode will totally lock your site, the user will have to inform his date of birth so that the module can verify that it is major

The screenshot shows a configuration interface for a popup module. It includes the following elements:

- Delay:** A text input field with the label "Delay" and a description "Delay before popup appears".
- Date start:** A date picker field with the label "Date start" and a description "Date popup will start to appear".
- Date end:** A date picker field with the label "Date end" and a description "Date popup will end".
- Active:** A toggle switch with the label "Activé" and a description "Enable popup". The switch is currently set to "NON" (red) and "OUI" (grey).
- Buttons:** At the bottom, there are two buttons: "Annuler" (Cancel) with a close icon and "Enregistrer" (Save) with a save icon.

Choose if necessary a delay before the popup is displayed

Specify start date (field not required) and / or end date (field not required)

Save to save your first popup
