

EVER AWIN DATA FEED

Product Flow Module for Awin

Presentation

This module allows you to set up a product feed with Awin affiliation

Installation

Go to the "Modules" section of your site's administration and click on "Install a module"

Get the module archive on your computer and send it to the area that appears on your Prestashop site

The module will install itself if your Prestashop version is 1.7

A screenshot of the Prestashop administration interface showing the 'Modules installés' (Installed Modules) section. The interface has a top navigation bar with 'Modules installés', 'Sélection', and 'Notifications' (with a notification icon). Below this, a grey bar indicates '11 modules installés'. The main content area shows a list of installed modules. The first module is 'Ever Awin Datafeed', version v1.0.0, by Team Ever. Its description is 'Export and send your data feed to Awin using this automated module'. To the right of the module name is a 'Configurer' button and a dropdown arrow.

Configuration

If you want to export to your feed only certain categories, use the first field to ban one or more categories. Products in these categories will not be put in the csv file for Awin.

⚙️ PARAMÈTRES

Banned categories
Leave empty for no use

* Datafeed language ▼

Export prices with taxes
Export products prices with taxes ?

Tax ▼
Please choose a tax

 Enregistrer

Specify in which language you wish to export the data, and set whether or not the prices of the products in the feed will be with or without taxes.

In case you have determined prices with taxes, select the default tax.

Click Save to save your settings

URL of cron and manual trigger

The module allows you to automate the flow so you do not have to manually generate it manually.

At the top of the page, you will find both the URL of the cron, but also the URL of the generated file, including in its name the identifier of the shop

😊 EVER AWIN DATAFEED

Welcome to Ever Awin Datafeed !

To forget to set this cron to automate datafeed csv creation
[http://localhost/ps17/modules/everpsawindatafeed/datafeedcron.php?
token=594ae87d4b&id_shop=1](http://localhost/ps17/modules/everpsawindatafeed/datafeedcron.php?token=594ae87d4b&id_shop=1)

CSV datafeed will be available on this URL
<http://localhost/ps17/modules/everpsawindatafeed/views/datafeed/datafeed-1.csv>

Click on the first link to generate the CSV file, and click on the second link to download the CSV file.

The URL of the first link will be set on your server cron job at the frequency that suits you the most.

The URL of the second link will be provided to Awin in your panel so as to automate the integration process on their side.

All Team Ever thanks you for purchasing one of its Prestashop modules!
